

RKS-2L/RKS-2M

REMOTE KEY STATION

INTRODUCTION

RKS-2L and **RKS-2M** remote key stations are designed for security system ON-OFF control applications. They are built with the universal connection terminals and can be used freely in most of the security systems.

RKS-2L provides switching ON contact in latch. The **RKS-2M** provides momentary contact with spring return. Both key stations incorporate with tamper switch and 2 LED lamps for free connections.
